

EPIM Joint Qualification System

Purpose

EPIM JQS is a service that enables pre-qualification of suppliers to the operators and buyers on the Norwegian Continental Shelf.

Description

- A solution for pre-qualification of suppliers and their products and services
- The solution provides key information about the suppliers and their capability assessments of own operating management systems
- The solution facilitates selection of relevant suppliers to be included in procurement processes

Benefits

- Makes it possible to find all relevant suppliers, based on the products and services
- Offers access to suppliers' key contact information
- Provides one common verification process for both suppliers and operators
- Offers access to business register information, credit score and financial data
- Has a modern user experience with cognitive search functionality and analytics available for reporting and analysis
- Provides easy access to information about supplier, self-assessment of compliance with relevant HSE, quality and risk management standards
- Enables the procurement professionals to work more efficient with an overview of both HSE, QRM and general supplier information in one place
- Simplifies supplier contact information on key personnel
- Provides one common verification process, resulting in savings in time and cost for both supplier and operator

Users

- All operators on the Norwegian Continental Shelf
- Suppliers to the oil and gas industry
