

ILAP Schedule Exchange

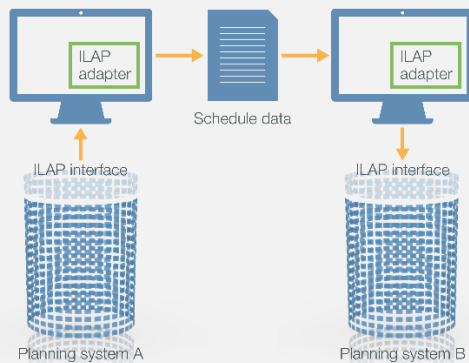

Purpose

Enables efficient transfer of schedule data between planning tools.

Description

Easy and fast sharing of quality planning data, both within and between organizations enables safer, faster and better decisions.

ILAP interfaces translate the schedules from commercial planning tools to the standard format, readable to other planning tools also equipped with an ILAP interface.

By installing the ILAP adapter, the files can be imported and exported to the different tools. The exchange format is based on ISO 15926-13.

Value chain impact

Pre-award	Exploration ✓	Development ✓	Operations ✓	Decomm. ✓
-----------	---------------	---------------	--------------	-----------

Benefits

- All on- and offshore work in one schedule
- Spanning from long term (high level schedules) to short terms (work orders and job card) planning
- Early definition of offshore hot work, work above open sea, pre-shut down, shut down and post-shut down activities
- Reductions and optimization of simultaneous activities in an area
- Drastic reduction of time and effort sending and receiving schedule updates
- Standard for integration of schedules anytime, anywhere
- High quality of structure of schedule
- High schedule usability
- Easier to perform quality assurance, analysis and transfer of experience

Participants

- Operators
- Contractors

Provider

Promineo is a cloud-based software that helps medium and large engineering organizations deliver profitable projects by digitalizing the project staffing process.
