

Launching of Collabor8 – Information sharing in the energy industry

We are happy to announce that we have gathered our various digital tools and collaboration services under one common umbrella, namely **Collabor8**, being a trademark registered by Norwegian Oil and Gas.

Collabor8 is built on the successful legacy of the EPIM joint industry collaboration, merged into Norwegian Oil and Gas 1 July 2019.

The whole portfolio of services has undergone a re-branding process, both in terms of appearance and content.

Why do we do this?

- To provide our service portfolio with its own identity, supporting further strengthening of our message as a non-profit based enabler for more efficient information sharing between operators, partners, authorities, suppliers, and other parties in the industry
- To allow industry stakeholders to share ideas and enable innovation
- To make it easier for stakeholders to get insight into the complete service portfolio, and the various ongoing initiatives
- To be an enabler for harvesting synergies across the **Collabor8** service portfolio

What does this mean in practice?

- A new common graphical profile on all services
- Launching of www.collabor8.no as the portfolio's new information portal where we gather all relevant information about our various service offering
- Updated service- and privacy terms (primarily cosmetic), moved to new resources www.collabor8.no/terms-of-services and www.collabor8.no/privacy-terms
- New names for all services (current/old name in brackets)

Collabor8 API module for cash call and billing (Digital Standard for Cash calls and Billings)	Collabor8 ILAP (ILAP Schedule Exchange)
Collabor8 EqHub (EqHub)	Collabor8 License2Share (License2Share)
